

Making a 3-D ear of corn

Instructions

1. Draw rows of round kernels on *ear* and color them yellow. Color *husk* light green.
2. Cut both drawings along the dotted lines.
3. Fold *ear* to create a cylinder, and tape edges together.
4. Fold bottom flaps over each other and tape to create a flat bottom for the ear of corn.
5. Carefully pinch flat two inches lengthwise on top of *ear*. Make small vertical cuts into the flattened section to make the silk. Tape the silk together.
6. Fold *husk* around *ear* and tape edges together. Tape bottom flat. Gently bend the leaves.
